

Consultancy Services

Let us help you find the hidden value in your current solutions and help support and guide your future vision. If you're evaluating Nomad's cutting-edge vehicle technology, or if you've already started to use it and you're looking to take your first steps, our discovery days could be what you need. If you are using someone else's tech, considering a switch, we can audit, advise and recommend improvements.

Whether you are trying to improve performance, improve passenger experience, or save money around your maintenance processes, Nomad's experts will analyse which solutions would yield the greatest return on investment (ROI) for your business and provide you with a roadmap to help you take the next steps.

Key benefits for you

- We undertake a fact-finding mission to understand your key challenges & related business processes
- We will review your current solutions and how you can extract greater value from your current and future investments
- We provide you with a personalised report documenting our audit and recommendations

Expert Advice

Nomad offers a range of advisory services to help our customers meet their goals, and their passengers' requirements. These include: WiFi, Passenger Information Screens and Remote Online Condition Monitoring solution designs, radio frequency reviews, coverage surveys, data assurance services, upgrade reviews, and maintenance approaches and processes.

Our experts have years of experience and are constantly innovating to develop on-board & communication technologies for this ever-evolving industry.

So, ask us for advice. We are here to support you and your business's needs.

Key benefits for you

- Nomad has over 15 years of experience – use it
- Our experts have a unique blend of information technology skills, rail skills and experience across the globe
- We will help you extract the most value from your current solutions
- We will watch the industry and advise when upgrades should be discussed
