

# Security-as-a-Service

Nomad's Security-as-a-Service offers a comprehensive approach to Cybersecurity that goes beyond a "software-only" solution to aid the detection and response to an actual or suspected cyber-attack, against the on-train and shoreside core components of Nomad's internet on-board solution.

Nomad Secure Intrusion Detection Service provides a mechanism to identify an actual or suspected cyber-attack and provides real-time alerts of an on-going incident which are monitored by our 24/7 Service Desk.

Nomad Secure Management Package compliments the Intrusion Detection Service by providing comprehensive monitoring, analysis and reporting service as well as regular information security audits and vulnerability assessments. The Management Package provides key stakeholders with the required information to evidence compliance with industry advice or standards as well as showing the effectiveness of the security controls in place to protect both the transport operator and the passenger.

## Key benefits for you

- Intrusion detection and real-time alerts
- Security management plan
- Monthly incident reporting
- Regular vulnerability assessments
- Information Security audits and compliance review
- Customer assurance that Information Security is taken seriously
- On-train and shoreside

# CCTV

Transport operators' focus on passenger and staff safety is fully supported by Nomad's on-board security systems. Nomad's CCTV capabilities provide a safe journey with efficient use of a transport operator's time and resources, offering both operators and passengers the reassurance of peace of mind travel.

By upgrading existing CCTV systems to give real-time visibility and recordings of images and videos, you can extract footage without visiting a depot.

## Key benefits for you

- Imaging and storage can be completely flexible based on each operator's requirements
- Evidence management: recorded CCTV can be reviewed as HD CCTV footage 24 hours a day
- Real-time CCTV: ability to view HD CCTV footage in real-time once an alert has been raised
- CCTV is a deterrent for criminals, offering passenger reassurance
- Overview of what is going on externally and internally
